from Hunter Urology  
is a registered Trade Mark

antibac<sup>av</sup><sup>®</sup>

Caring for patients' needs,  
caring for your needs.

antibac<sup>av</sup><sup>®</sup>

Introducing **antibac AV** from Hunter Urology, the worlds first coated catheter for **ISC** with **Aloe Vera**.

**Aloe Vera** is a sub tropical plant of the lily family that has been used for medical purposes for over 4000 years. In recent times **Aloe Vera** has been called a 'miracle plant', 'the silent healer' and 'the first aid plant'.

**NEW Advanced Technology**

At the heart of patient confidence is the feeling of safety that comes from using a comfortable catheter, which is why we developed the new, coated catheter for ISC with **Aloe Vera**.

When activated with water, the unique aloe vera coating becomes lubricious for easy insertion and removal.

**Benefits of antibac AV**

- Reduce inflammation
- Accelerate cell replication
- Increases lubricity
- Available on prescription

Feeling safe feels good.  
That's how we feel, so we  
invented the worlds  
first antimicrobial  
catheter for ISC with  
**Aloe Vera**.

Smoothly rounded catheter eyes protect the urethra and avoid risk of injury.

The only way for safe self-catheterisation.
